DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:
3. The claimed invention uses a translation look-aside buffer (TLB) common in the art. However, applicant uses a novel method to allow processor to select between a multi-threaded and a single threaded mode of operation. The inclusion of the thread implicit mode (special mode) bit to select between portion of real address bits as thread identification or real page number bits. Use of portion of real address bits as thread identification of real page number bits provides increased translational capacity of TLB for multi-threaded computer processes.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
